

# Amplify the Power of Your Oracle Applications with UiPath Robotic Process Automation

When organizations rely solely on existing systems to support core business processes, it prevents them from operating at full capacity or capitalizing on the latest technologies. Yet, updating those complex systems to accelerate workflows, remove bottlenecks, and drive productivity can be a significant undertaking. Until now.

UiPath Robotic Process Automation (RPA) accelerates digital transformation across business processes on existing systems with powerful automations, seamless integrations, and AI technologies.

UiPath, the leading RPA provider, infuses both Oracle applications and non-API-based applications with powerful and sophisticated automations that streamline critical workflows.

Automate repetitive, time-consuming tasks to deliver a scalable digital workforce that can keep up with the speed of business. Leverage the combined strength of RPA and AI to automate complex tasks and further streamline your core business processes, so you can get back to the work that needs a human touch.

## Support enterprise transformation with powerful RPA solutions from UiPath

### Deploy best-in-class automation for Oracle Applications

Automate end-to-end processes across Oracle applications, including Siebel, Peoplesoft, ERP, JDE, NetSuite, and HCM with deep integrations that amplify productivity, eliminate manual errors, and reduce operational costs.

- Use pre-built drag-and-drop activities to easily orchestrate business process automation without customization or disruption of the IT infrastructure.
- Increase workforce capacity and achieve rapid results.

### Empower end-to-end automation leveraging Oracle Integration Cloud (OIC)—and skip the APIs

Extend the process automation and integration capabilities of the Oracle Integration Cloud Service with UiPath's RPA Platform. Achieve a faster time to automation value and reduce development times by taking advantage of our out-of-the-box, low code integration capabilities.

- Realize faster time to value with pre-built integrations that drastically reduce development times and requirements.
- Create a highly scalable, advanced digital workforce that produces measurable results.
- Implement seamless automation within and outside of Oracle applications with streamlined integration.

## Easily deploy and manage RPA in the Oracle Cloud Platform

Ensure completely predictable deployments with automations that allow you to effortlessly and quickly scale your digital workforce to adjust for shifting workloads, increasing productivity at a moment's notice.

- Configure virtual machines and deploy robots based on the changing needs without any manual intervention.
- Decrease disruptions for end users.
- Power your automations across the entire Oracle environment, giving your organization a competitive edge.

## Rely on the platform with defense-grade security and trusted compliance

Choose the RPA platform that more than 60+ government agencies trust for secure automation and simplified compliance in both on-premises and cloud environments.

- Protect against security threats with Role Based Access Control (RBAC), encryption everywhere, and Veracode certified code.
- Adhere to all required regulations using simplified compliance processes and detailed audit logs.

## Unlock more value with our open and extended partner ecosystem

Distinguishing your business from the competition requires both cutting-edge technology and the right partnerships. With UiPath, you get unmatched RPA expertise, state-of-the-art AI, powerful automation solutions, and a large partner ecosystem that works for you.

As a certified Oracle Gold Partner (OPN) and Technology Partner, UiPath has extensive experience and unparalleled expertise delivering solutions across all Oracle applications. The UiPath RPA Platform includes hundreds of built-in, customizable and shareable activities, allowing you to extend the reach of AI-driven automation throughout your organization.

With deep integrations with CRM, ERP, BPM and AI technologies and platforms, UiPath can help any business transform its existing systems and bring the latest technology into the enterprise.

Our expertise in RPA and AI, along with our commitment to customer-driven innovation, will help you discover more opportunities to incorporate this exciting technology and continually improve and expand your business. Integrate with the technologies you depend on today while building a path toward tomorrow.
