A Robot for Every Person

Drive business impact at scale by empowering every employee to use, create, and benefit from automation

Automation frees your workforce from tedious tasks so they can work:

**Faster**

More accurately

**Creatively & collaboratively**

On higher value tasks

Imagine what your company can do if *every employee* gets their personal robot to assist with everyday tasks, from the simplest to the most complex.

Bring 'a robot for every person' to life in your company

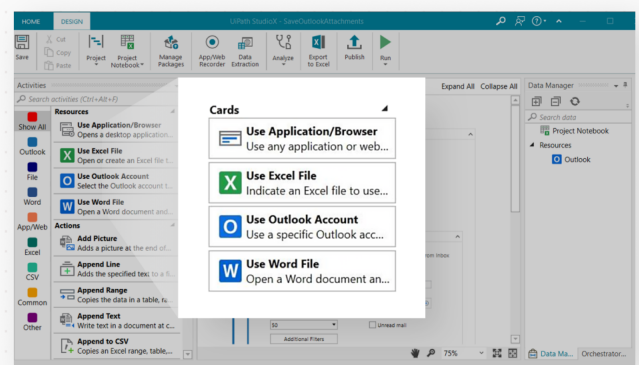

Give every employee a robot assistant

Give your workforce easy access to automation with **UiPath Assistant**, an intuitive desktop application that allows each employee to access, manage, and run CoE-approved automations.

Enable your employees to benefit from robot-powered web experiences that are built on top of existing applications with **UiPath Apps**.

Democratize automation development

UiPath StudioX lets tech-savvy business users ("citizen developers") build automations for their personal or team use—with no coding knowledge required.

UiPath Studio gives RPA developers advanced software to build robots that automate a wide range of end-to-end processes.
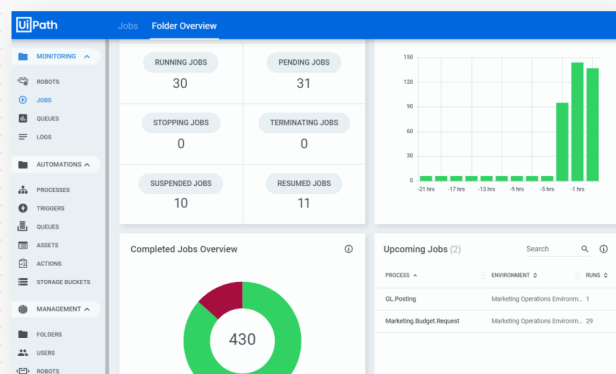

Unlock bottom-up innovation

Get ideas and pre-built automations from your workforce with **UiPath Automation Hub.** Crowdsource and prioritize automation ideas and easily manage your RPA pipeline. Validate and distribute citizen-led automations across the organization.

Centrally manage and govern automation

Control roll-out and license distribution, and monitor robot usage in **UiPath Orchestrato**r. Deliver automation to every employee's Assistant according to department and team permissions.

Leverage governance support in **Studio** and **StudioX** to centrally control how automations are built.

A robot for every person delivers company-wide value

Efficiency

- Get work done faster

- Free employees to focus on strategic work

- Increase employee productivity

Quality

- Respond faster to compliance issues

- Reduce human errors

Competitive advantage

- Increase employee and customer satisfaction

- Retain employees

- Build agility and resiliency across the organization
