2013

### FIRST UI AUTOMATION

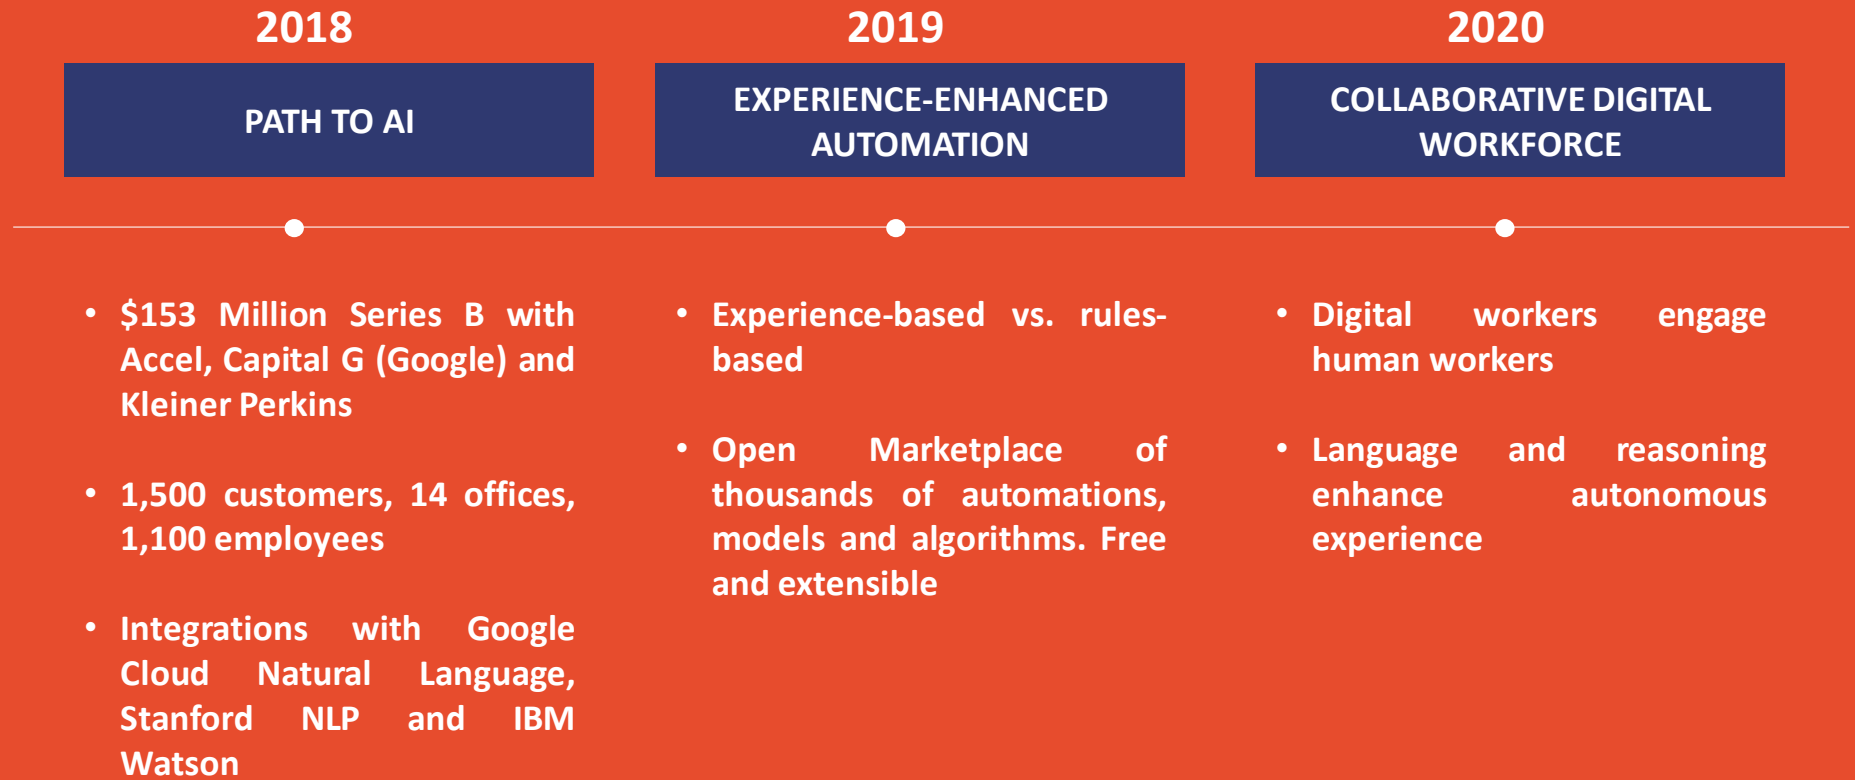

Desktop Automation product for Enterprise RPA

2005

### INFANCY

First automation libraries for developers worldwide

# UiPath to 2020

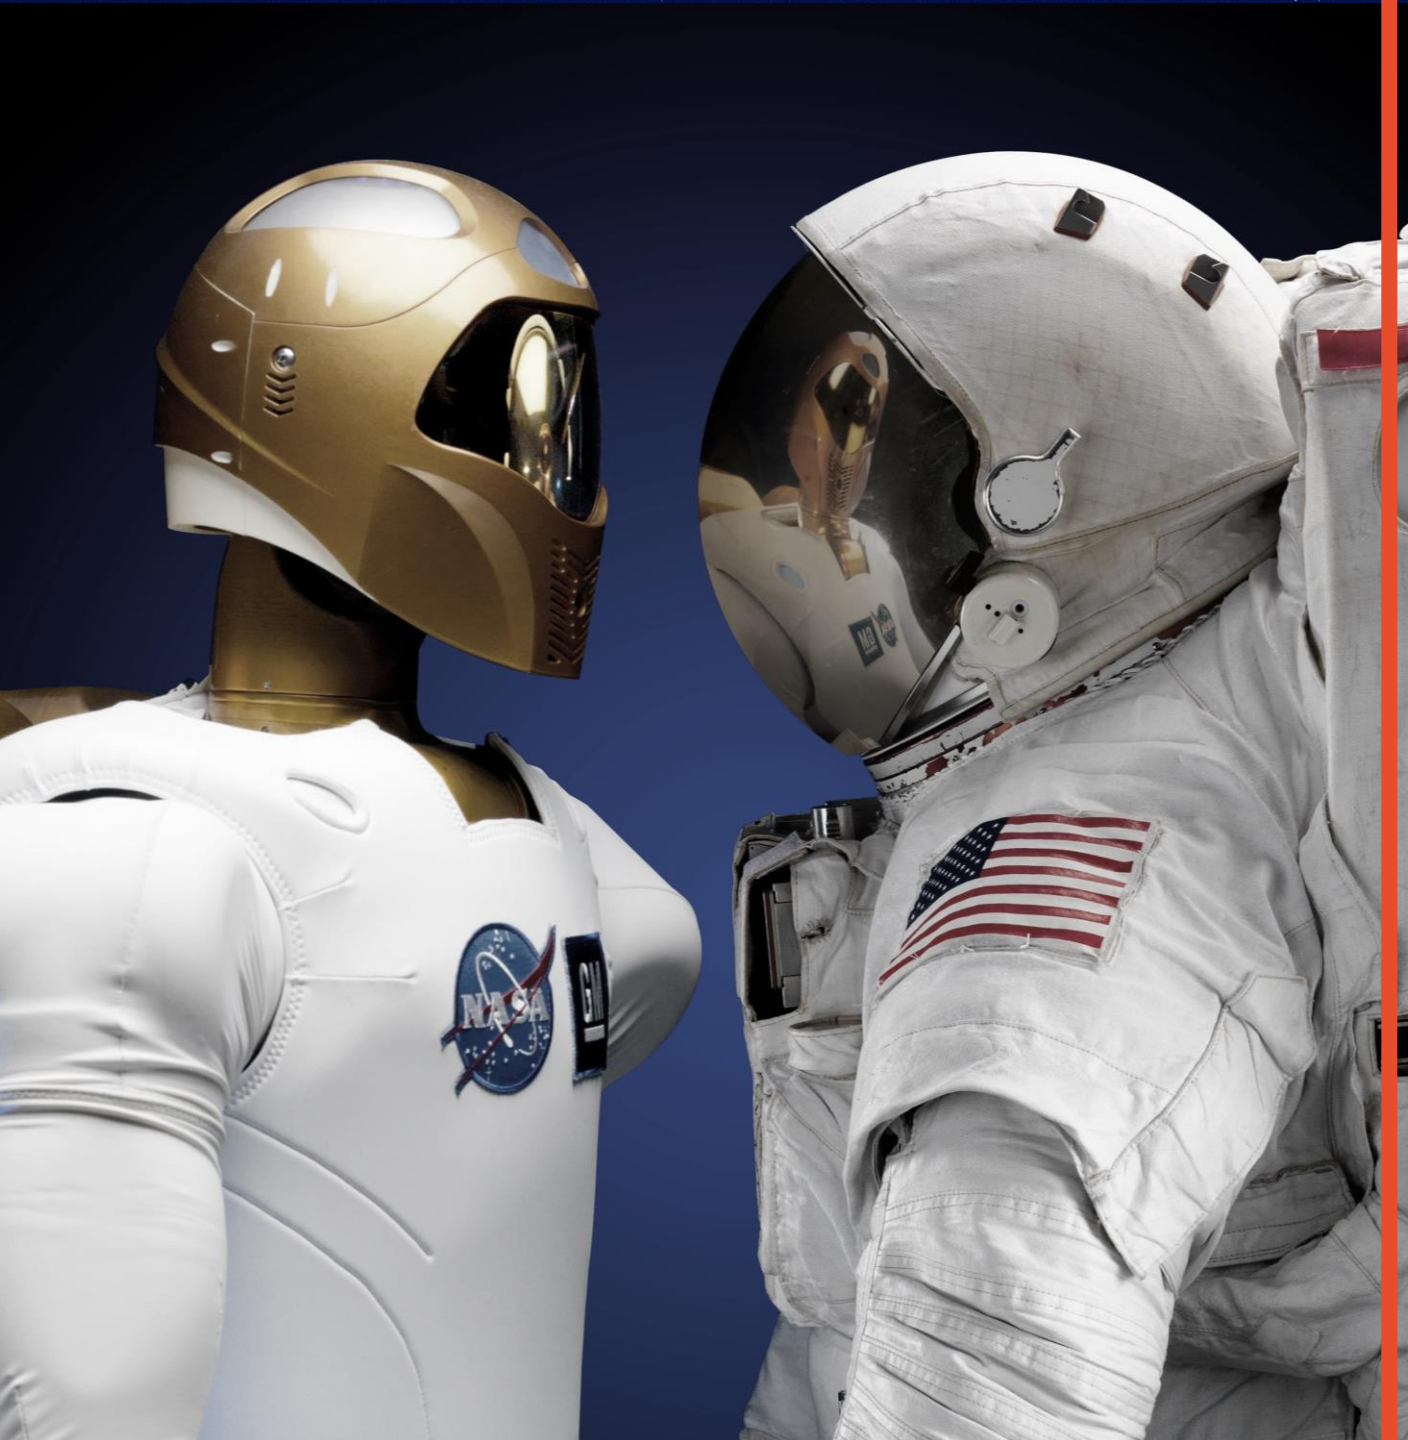

Humans.  
We were  
meant  
to be  
creative.

- Robots can do the work most of us hate doing anyway.
- On average, managers spend two full days per week on administrative activities and, in the U.S., approximately \$575 billion per year is spent performing administrative work.
- Millennial employees would rather make \$40,000 per year doing a job they love as opposed to making \$100,000 per year doing something boring.

## THE MYTH

- On average, managers spend two full days per week on administrative activities and, in the U.S., approximately \$575 billion per year is spent performing administrative work.
- Millennial employees would rather make \$40,000 per year doing a job they love as opposed to making \$100,000 per year doing something boring.

# 9 IN 10 LOOK FORWARD TO MANAGING AI ROBOT CO-WORKERS.

*January 18, 2018*

---

**88%** of respondents would be comfortable with the prospect of working alongside intelligent machines, while a further

**91%** are comfortable with the prospect of managing them.

# UiPath is the platform for Future of Work

---

- Automate today with speed and accuracy
- Improve process sophistication with ML, NLP and AI through RPA
