

UiPath Opens New Office in Cluj

Company Appoints Andrei Roth to Lead the Second Romanian RPA Hub

Bucharest, May 14th, 2018 - [UiPath](#), the leading enterprise Robotic Process Automation (RPA) software company and the first Romanian-born unicorn, today announced the opening of its second office in the country. The decision to create a new RPA development team in Cluj was prompted by the acquisition of the Smart Data Platform technology from Recognos, the well-established Cluj-based software company founded more than 18 years ago.

The Cluj office will be built around a team of people that contributed to the development of the Recognos Smart Data Platform, and will be led by Andrei Roth, former manager of the local Recognos office.

Andrei has ambitious hiring plans for the next months and he has already begun searching for Cluj-based senior .NET developers as well as RPA developers. The future Cluj-based UiPath .NET team will develop core activities for the UiPath platform, while the RPA developers in the Cluj office will focus on supporting UiPath's implementations and partners in the German-speaking countries.

To give more information about the company's hiring plans in Cluj, the UiPath HR team will welcome applicants and answer questions at the company's booth during the DevTalks Conference in Cluj on May 16th.

"UiPath's Cluj office is the latest addition to our expanding global operation, and it made perfect sense to open our second Romanian office here as we will tap into an impressive IT talent pool", declared Daniel Dines - CEO and Co-Founder of UiPath. "As our fourth product development hub, the smart minds of Cluj will work in a truly global team alongside our developers in Bucharest, Bellevue - US, and Bengaluru - India."

"I believe that the talented resources of Cluj fully deserve the exciting and envelope-pushing work environment and company culture that UiPath offers. RPA is reinventing the very concept of work, and UiPath is a visionary company at the forefront of this global phenomenon. Smart and dedicated professionals are the trailblazers of UiPath on almost all continents, and I know that our local team will significantly support the growth of our first unicorn", said Andrei Roth - the manager of the Cluj office.

The use of the Smart Data Platform within UiPath RPA platform will allow for a simpler and faster information extraction from unstructured data sources.

UiPath now employs more than 700 professionals across 14 countries, and plans to increase employee headcount by more than 40% until the end of August 2018. For more information on career opportunities with UiPath, please visit <https://www.uipath.com/jobs>.

About UiPath

Built for both business and IT, UiPath is the leading platform for enterprise Robotic Process Automation (RPA). More than 1,100 enterprise customers and government agencies use UiPath's Enterprise RPA platform to rapidly deploy software robots that perfectly emulate and execute repetitive processes, boosting business productivity, ensuring compliance and enhancing customer experience across back-office and front-office operations.

With a thriving RPA developer community of more than 120,000 worldwide, UiPath is on a mission to democratize RPA and support a digital business revolution. Based in New York City, UiPath's presence extends to 14 countries throughout North America, Europe and Asia. The company is backed by \$183M in series A & B funding from Accel, CapitalG, Kleiner, Perkins, Caufield & Byers, Credo Ventures, Earlybird's Digital East Fund and Seedcamp. UiPath's Series B valuation exceeded \$1.1 billion.
