

Built for both business and IT, UiPath is the leading platform for Enterprise Robotic Process Automation (RPA). More than 1,800 enterprise customers and government agencies use UiPath's Enterprise RPA Platform to rapidly deploy software robots that perfectly emulate and execute repetitive processes, boosting business productivity, ensuring compliance and enhancing customer experience across back-office and front-office operations.

UiPath has been created in 2015 on the foundation of the 10-year old Romanian software outsourcing company DeskOver, started by [Daniel Dines](#) and [Marius Tirca](#) in Bucharest. They began orienting resources into training and orchestrating software robots back in 2012, and one year later the company initiated its first RPA journeys, with Sutherland and Dell.

Upon concluding its first partnerships with global BPO and Consulting companies such as Cognizant, Capgemini, Symphony, and Genfour, UiPath closed in 2015 an initial seed round of investment from [Earlybird's](#) Digital East Fund, [Credo Ventures](#) and [Seedcamp](#).

This has been used for the launch of the Front Office and Back Office Server suites, the start of the global expansion with offices in London, New York and Bengaluru, but also to make available the Studio Community Edition for free download.

The seed round was followed by a series-A \$30 million funding in April 2017, and in March 2018 by a series-B funding where UiPath raised \$153 million becoming a unicorn company, with a valuation of \$1.1 billion. Both rounds were led by [Accel](#) and saw participation from the first investors. The 2018 funding was also backed by co-contributors [CapitalG](#) (former Google Capital) and [Kleiner Perkins Caufield & Byers](#).

Reflecting back, 2017 was clearly the year of global growth for UiPath, with teams scaling up and new locations opening around the world: Tokyo, Singapore, Australia, Paris. UiPath Academy was also born, allowing thousands of people worldwide to train with the UiPath RPA Platform solution.

The company's footprint in the automation industry was acknowledged with several honoring titles: a global Leader and Star Performer in RPA ([Everest Group](#)), and — based on superior technology — as RPA industry leader ([Forrester](#)). Following these up, in 2018 the [Everest Group's PEAK Matrix report on RPA named UiPath a Leader and Star Performer](#), making it the only vendor to receive the distinctions two years in a row. Consequently, UiPath has been recognized as a Leader in [The Forrester Wave™: Robotic Process Automation, Q2 2018](#) in June 2018.

In September 2018, UiPath received a \$225 million Series-C funding at a valuation of \$3 billion. The round was co-led by existing investment CapitalG and new investor [Sequoia Capital](#). Accel, which led both UiPath Series A and B rounds, also participated in this round.

UiPath currently has a global thriving RPA developer community of more than 250,000 members and is well on its way to democratize RPA and support the digital business revolution. It continues to accelerate the product roadmap, particularly with innovations that integrate machine learning (ML) and AI algorithms.

An overview of the UiPath RPA Platform can be found [here](#).

UiPath is now headquartered in New York City, with a presence extending to 14 countries throughout North America, Europe and Asia and hires a workforce of more than 1,300 professionals.
