

# Meet the UiPath 2020 Fast Track Support release - Discover all the features

The UiPath Enterprise RPA platform is built for hyperautomation. Our UiPath 2020 Fast Track Support release covers the full cycle of automation, including many key features that empower our customers to unlock maximum potential to reinvent their workplace.

Stage	Product	Description	New Features
 <p><b>Discover</b> Discover automation opportunities powered by AI and your people</p>	Automation Hub	Where employees connect to drive automation opportunities	<ul style="list-style-type: none"> <li>• Task Capture integration to accelerate the pace of automation</li> <li>• Veracode and ISO27001 certifications</li> <li>• Geo location support with US hosting</li> </ul>
	Task Mining	Build a high-ROI automation pipeline with AI-powered task analysis	<ul style="list-style-type: none"> <li>• One-click export of automation skeleton to Studio</li> <li>• Secure data upload and transfer</li> <li>• Governance with whitelisted applications and anonymized data</li> </ul>
	Process Mining	Take an x-ray of every process to holistically scale your automation	<ul style="list-style-type: none"> <li>• UiPath branding</li> <li>• Deploy in multiple languages</li> <li>• Improved process compare dashboard</li> </ul>
 <p><b>Build</b> Build automations quickly, from the simple to the advanced</p>	StudioX	Automate without coding	<ul style="list-style-type: none"> <li>• Web and UI automation</li> <li>• Seamless Office integration</li> <li>• Quick start templates</li> <li>• Governance</li> </ul>
	Studio	The only automation development environment you will ever need	<ul style="list-style-type: none"> <li>• Improved performance</li> <li>• Better UI automation</li> <li>• Governance</li> </ul>
	Studio Pro	New premium Studio for specialized developers	<ul style="list-style-type: none"> <li>• Testing capabilities, comprised of end-to-end application testing and RPA testing, including mobile test automation and data-driven testing</li> </ul>
	Document Understanding	New Product that supports document extraction and interpretation for a wide range of documents from structured to unstructured	<ul style="list-style-type: none"> <li>• Composable Document Understanding framework</li> <li>• Form Extractor and RegEx-Based Extractor</li> <li>• Intelligent Form Extractor</li> <li>• Machine Learning Extractor</li> <li>• Action Center based Validation Station</li> </ul>
 <p><b>Manage</b> Manage, deploy, and optimize automation at enterprise scale</p>	Automation Cloud	Start automating instantly and scale infinitely	<ul style="list-style-type: none"> <li>• Veracode, ISO 27001 certified</li> <li>• Additional data centers</li> <li>• New user experience</li> </ul>
	Orchestrator	Deploy, manage and optimize your robots with enterprise-scale integration and compliance	<ul style="list-style-type: none"> <li>• Modern folder deployment to unattended robots</li> <li>• Headless provisioning</li> <li>• Personal Workspaces</li> <li>• Developer flexibility with simplified storage support and job prioritization</li> </ul>
	AI Fabric	Apply AI to your automations in minutes	<ul style="list-style-type: none"> <li>• Pre-trained starter models</li> <li>• ML model retraining</li> <li>• On-premises support</li> </ul>
 <p><b>Run</b> Run automations through robots that work with your applications and data</p>	Native Integrations	Deep integrations with enterprise applications you use today, built by UiPath and backed by partners	<ul style="list-style-type: none"> <li>• UiPath Activity for ServiceNow, Workday, Oracle Integration Cloud Services, and NetSuite</li> <li>• ServiceNow Integration Hub UiPath Spoke</li> <li>• UiPath Platform Auto Deployment on Oracle Cloud Infrastructure</li> </ul>
 <p><b>Engage</b> Engage people and robots as one team for seamless process collaboration</p>	Action Center	Automate more work from start to finish through seamless human-robot collaboration	<ul style="list-style-type: none"> <li>• New business user portal</li> <li>• Third-party integration APIs</li> <li>• Dynamic task assignment</li> </ul>
	Assistant	Everyone wins with instant access to find and run automations right from a personal desktop hub	<ul style="list-style-type: none"> <li>• Enhanced attended experience</li> <li>• Run multiple attended automations at the same time</li> <li>• Simple user-based scheduling</li> <li>• Can be white labeled to use your brand</li> </ul>
 <p><b>Measure</b> Measure operations and performance to align with business outcomes</p>	Insights	Powerful, embedded analytics that measure, report and align automation operations with strategic business outcomes	<ul style="list-style-type: none"> <li>• Support for StudioX, Studio Pro and Test Automation</li> <li>• New dashboards including Long Running Workflows and Licensing</li> <li>• Support for Orchestrator folders</li> <li>• Streamlined installation and upgrading experience</li> </ul>
