

# Automate your SAP S/4HANA Migration with UiPath RPA

The S/4HANA business suite from SAP offers improved agility to re-imagine and digitize business processes. However, migrating to a new application platform has historically been challenging, involving significant time, cost, and manual work.

UiPath, an industry leading RPA provider, has a solution to help accelerate your SAP S/4HANA migration through automation. The UiPath Enterprise RPA Platform automates multiple phases of the migration process in parallel while reducing the overall critical path and timeline of the entire migration.

# How the UiPath Platform accelerates your SAP S/4HANA migration

## 1. Custom code identification, analysis and remediation

The UiPath Platform helps automatically remediate and optimize custom code, achieving rapid time to value.

- Identify custom code quickly with UiPath Robots
- Analyze any vulnerabilities in the existing code reducing the cost of assessment
- Check for compatibility resulting in decreased migration effort
- Remediate any issues automatically preventing manual errors

## 2. Testing and validation

Large scale end-to-end automated testing and validation coverage can be achieved rapidly with UiPath Platform without disruption to your team, your day-to-day operations, or your customers.

UiPath supports automated testing through the SAP GUI, Fiori, and other SAP clients.

- Create test cases and data sets dynamically reducing test time
- Execute tests continuously end-to-end for improved test coverage
- Automate Regression, Security, and Acceptance testing with RPA reducing cost and manual effort
- Visualize test progress and results in a PowerBI Dashboard

## 3. Security Compliance

UiPath offers a trusted platform for secure automation and simplified compliance with the regulations that matter to you. Defense-grade security and auditing include Role Based Access Control (RBAC), encryption everywhere, and Veracode certified code. Our technology is trusted as secure by 50+ government agencies.

## Beyond Migration - Path to digital transformation

Don't just automate your S/4HANA migration with the UiPath Platform, gain lasting business advantage with an "automation first" mindset. Reuse the automations post migration to improve day-to-day operational efficiency and generate returns beyond the migration process. Create a digital workforce that can automate critical business processes and give you a jump-start on your digital journey.
