The Go! Marketplace Story

Alexandru Statie

Global VP Presales

From idea...

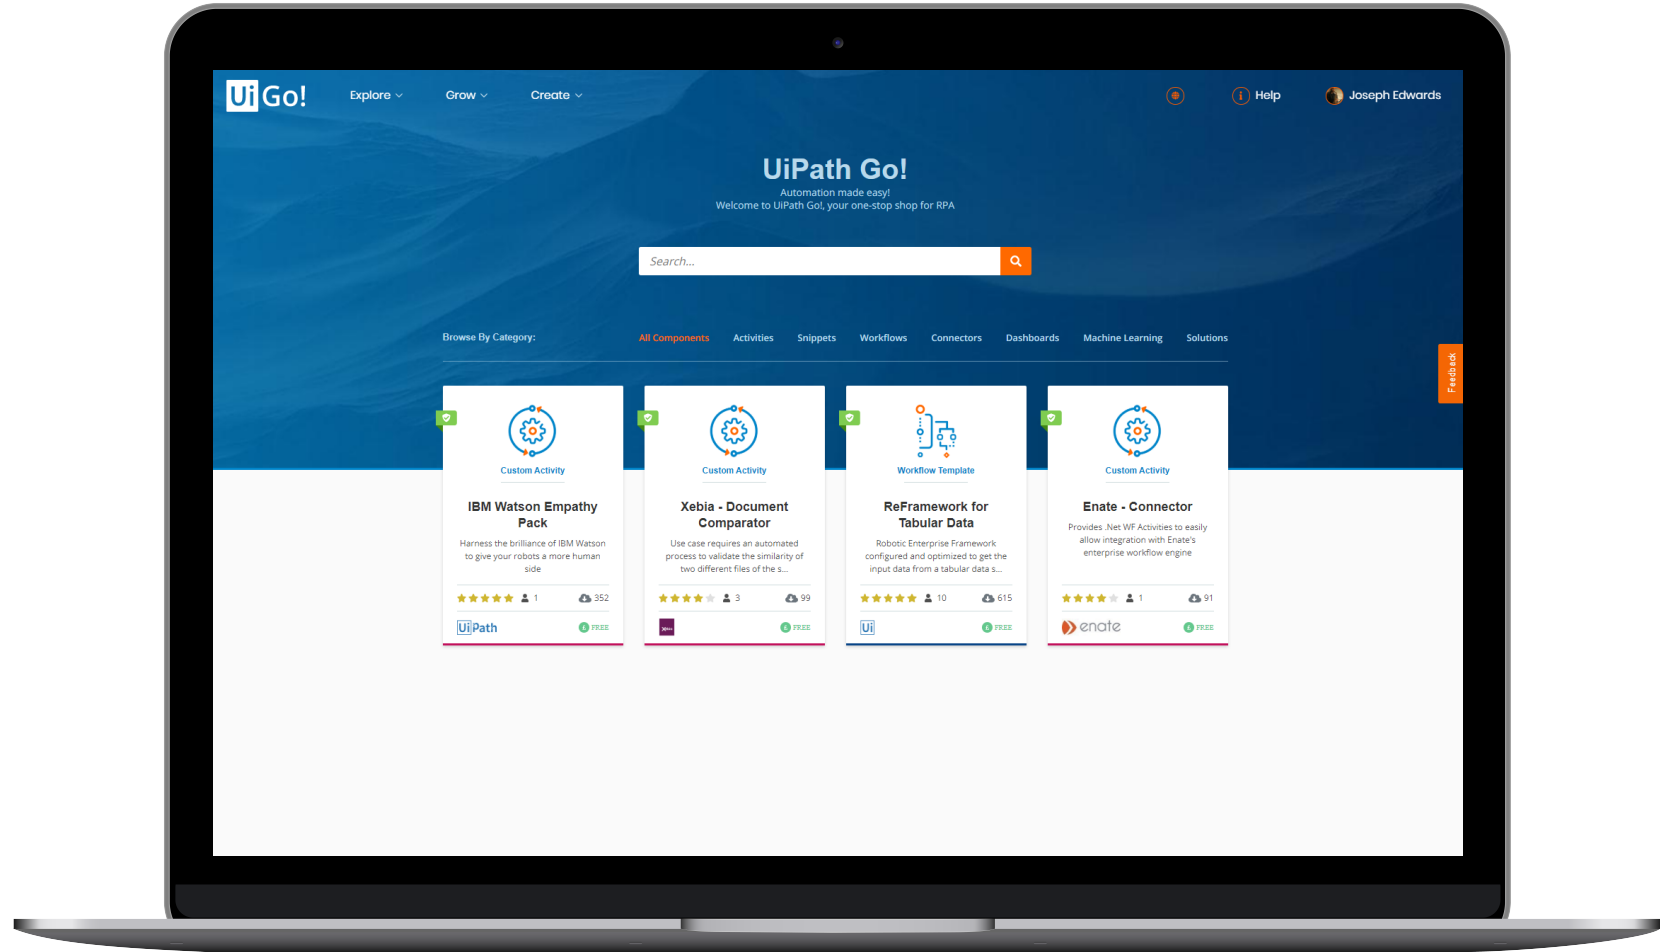

*“I think there is a **big community of developers** working on **similar scenarios** like invoice processing in SAP etc.*

*If we have **an app store for UiPath** where we can upload and download apps and customize to our needs, it will **reduce development time and build a great repository of scripts to reuse rather than re-create!**”*

Launch partner for UiPath Go! Marketplace

Hand in hand for a growing community and ambition

The screenshot displays the UiPath Go! Marketplace interface. The top navigation bar includes the 'UiGo!' logo, menu options for 'Explore', 'Grow', and 'Create', and user actions for 'Help' and 'Login / Sign Up'. The left sidebar contains filters for 'Language' (Japanese, English), 'Content Type' (Custom Activity, Snippet, Workflow Template, Connector, Dashboard, Machine Learning Model, Solution), 'Process' (Finance & Accounting, Legal, Human Resources, Information Technology, Sales, Artificial Intelligence), and 'Provider Type' (UiPath Labs, UiPath, UiPath Business Partner, UiPath Technology Partner, Community Business, Community Contributor). The main content area features six activity cards:

- Roboyo - Empty Folder Check** (Custom Activity): Checks if the given folder contains another file or folder in it. 0 stars, 228 downloads.
- Roboyo - Save Email Attachment** (Custom Activity): Saves a given Mail attachment object to file. 0 stars, 168 downloads.
- Roboyo - Fuzzy Logic** (Custom Activity): Compute the Jaro-Winkler, the NGram and the Levenshtein distance between two strings. Also lever... 0 stars, 203 downloads.
- Roboyo - LogFile Parser** (Snippet): The created UiPath LogFile is "beautified" and written into an Excel-File. 0 stars, 284 downloads.
- Roboyo - Int to Excel Column** (Custom Activity): Converts the given ColumnCharacter to a number and adds that to the ColumnNumber and this Number ... 0 stars, 75 downloads.
- Roboyo - Petze – the RPA Quality Code Reviewer** (Solution): Petze is a revolutionary RPA code reviewer that will help and guide you in all your RPA implement... 0 stars, 38 downloads.

All activities are provided by 'ROBOYO' and are marked as 'FREE'.

Further democratization of RPA

Demonstrate technical expertise and knowledge

Accelerator for RPA projects

Higher quality and consistency

A vision for the whole automation lifecycle

Automate the automation

The screenshot shows the UiGo! website interface. At the top, there is a navigation bar with the UiGo! logo, menu items 'Explore', 'Grow', and 'Create', a search bar, and icons for globe, help, and user. Below this is a secondary navigation bar with 'Overview', 'Media', 'More Info', 'Reviews', and 'Questions'. The main content area features a section titled 'Roboyo - Petze – the RPA Quality Code Reviewer'. On the left, under 'Overview', there is text describing Petze as a revolutionary RPA code reviewer. On the right, there is a 'solution' card with a lightbulb icon, the title 'Roboyo - Petze – the RPA Quality Code Reviewer', a 'Sign In/Sign Up' button, and a 'Bookmark for later' link. Below the card, there are details: 'Published: 23/05/2019', 'Enquiries: 38', 'Tags: Studio Rpa Quality Orchestrator Devops Ci Cd Roboyo Petze', 'Process: Information Technology', 'Language: EN', and 'Producer Details:'.

Overview

Petze is a revolutionary RPA code reviewer that will help and guide you in all your RPA implementations.

What is Petze?

Petze is a revolutionary RPA code reviewer that will help and guide you in all your RPA implementations.

We have automated RPA Code Quality Assurance making it easier than ever to ensure that no automation fails in production.

By simply dragging your UiPath project into Petze, you are connected to the Roboyo Knowledge Base which gives you an explanation of each best practice as it is evaluated in real time. This allows developers to be trained as they go along, speeding up the RPA learning curve.

For example, is there a hardcoded password creating a potential security breach? Petze will flag it! Are the naming conventions not followed properly, thus decreasing code re-usability? Petze will flag it!

Petze is also configurable which allows you to enable and disable

Intelligent Process Automation

Accelerated with 

Common Barriers to the Augmented Workforce at Scale

Common barriers to RPA adoption

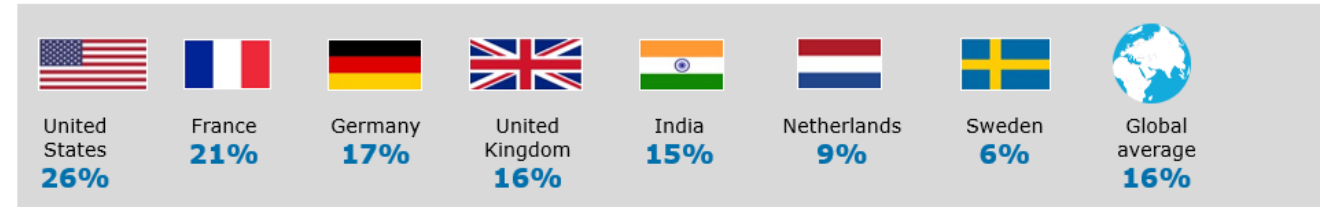

- Human impact
- Process traps
- Talent scarcity
- Data accessibility
- Unclear use cases
- Isolated strategies
- Sponsorship
- Technical complexity
- Development time

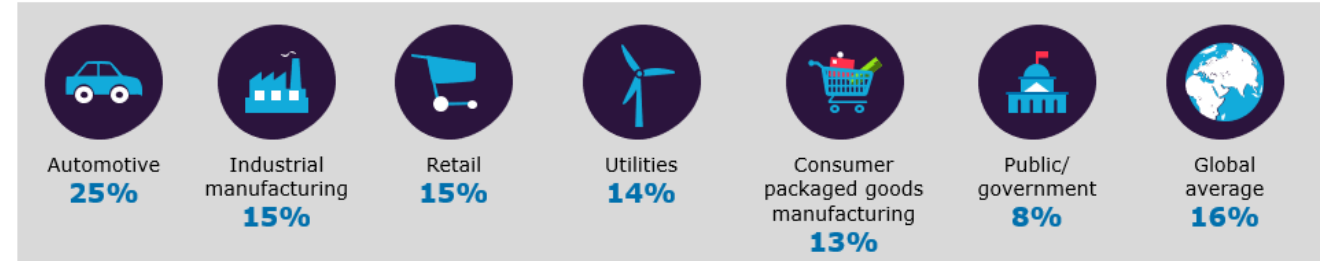

Automation maturity

A national and sector perspective on scale

Proportion of organizations implementing automation at scale by country (as a % of organizations experimenting with or implementing automation)

Proportion of organizations implementing automation at scale by sector (as a % of organizations experimenting with or implementing automation)

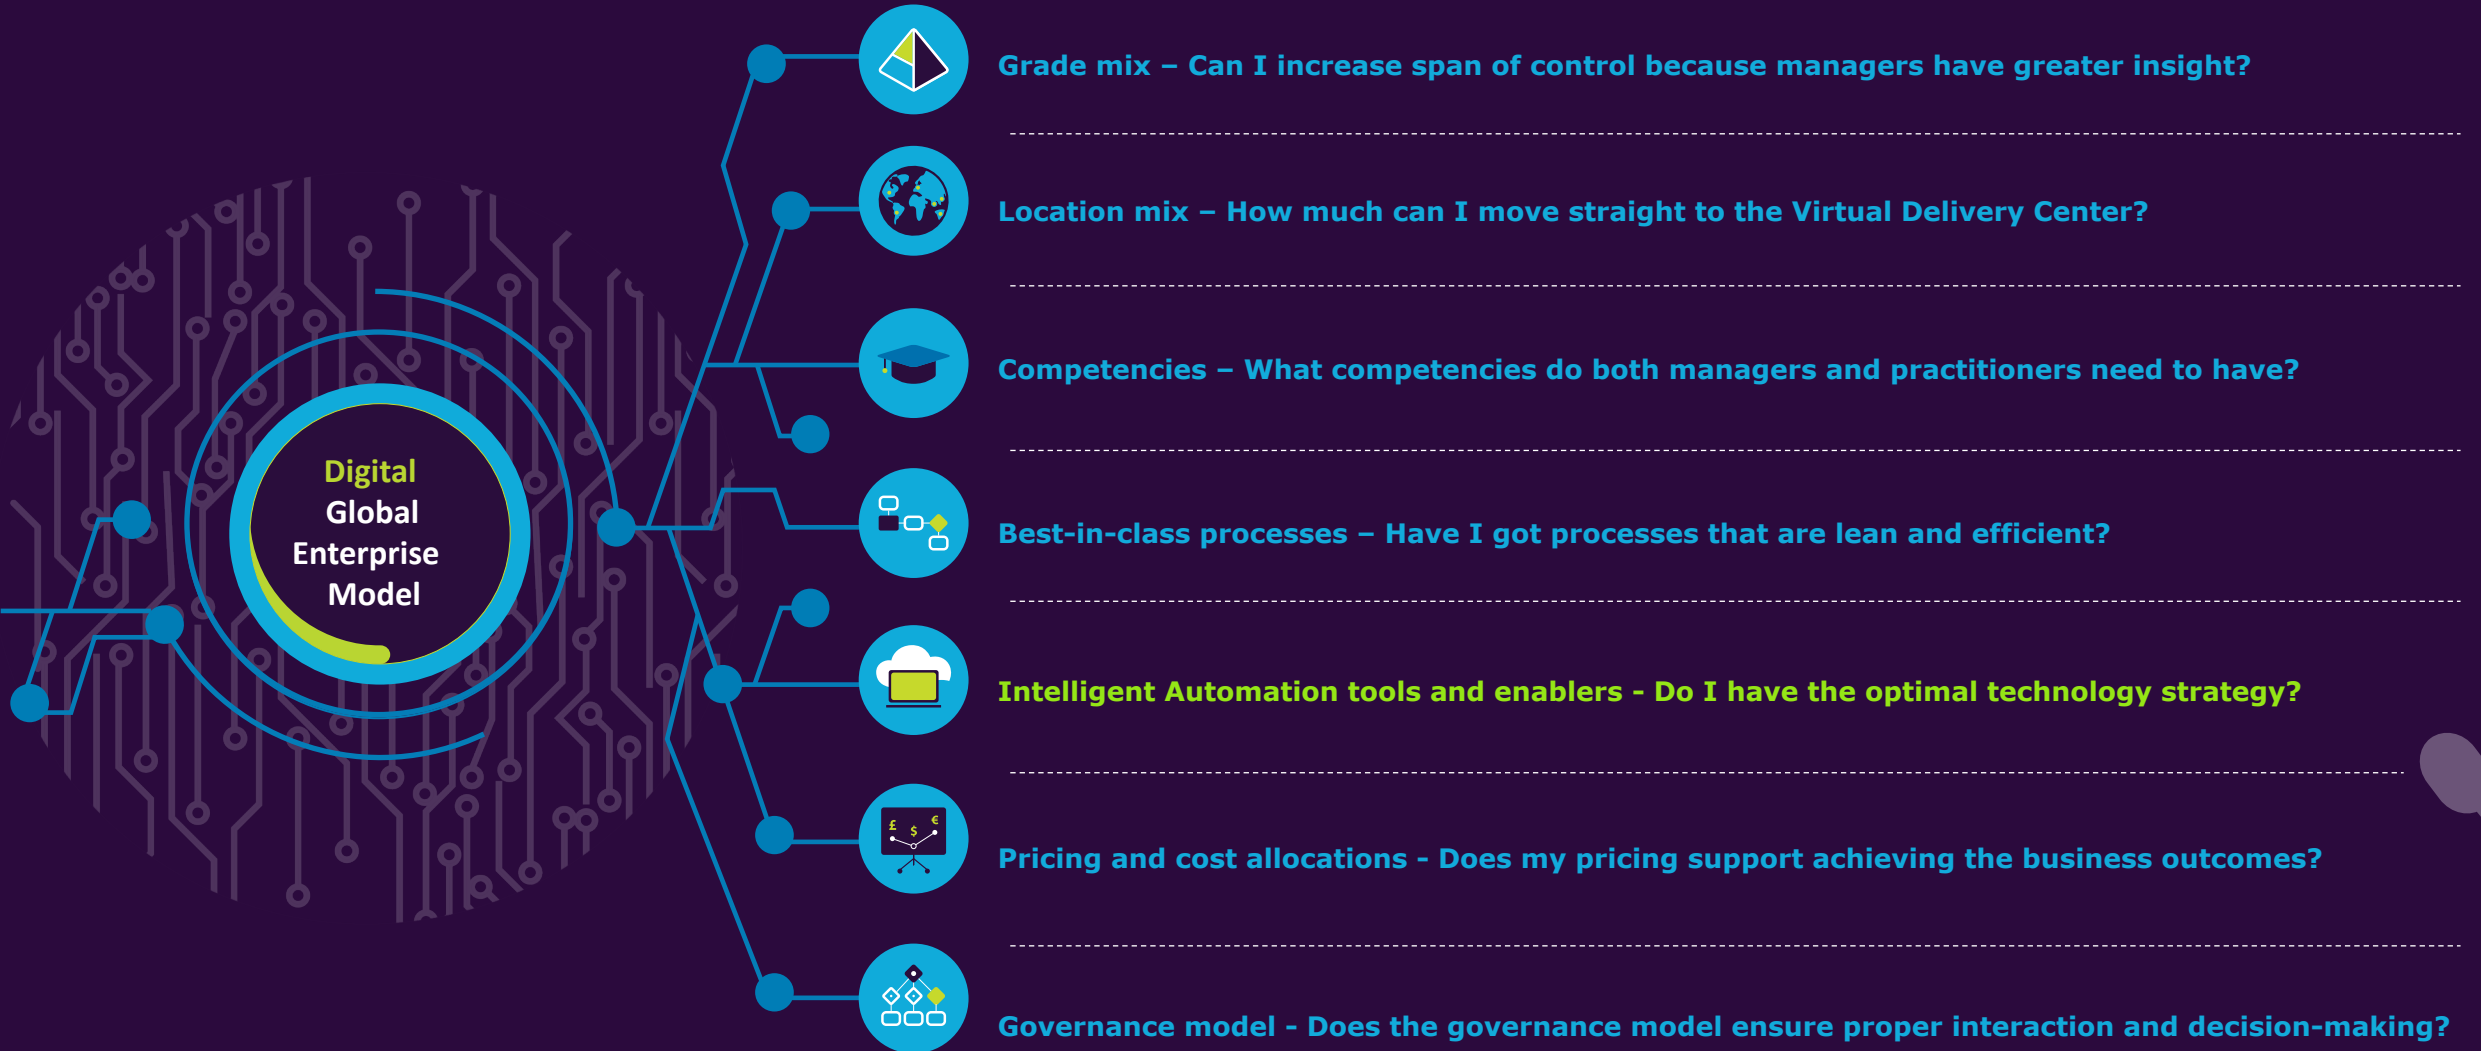

Source: Capgemini Research Institute, Automation Use Case Survey; 2018, N=705 organizations with greater than €500m revenue that are experimenting with or implementing automation initiatives.

*At scale represents deployment of multiple automation use cases at scale, i.e., across multiple processes and across the breadth of the countries the company operates in.

The Capgemini Digital Global Enterprise Model

IPA TRANSFORM: *Next Generation of Reusability*

Intelligent Process Automation

Digital Global Enterprise Model© (D-GEM)

Best practice meets reusable UiPath components

- 150+ Sector BOTs
- +4,500 use cases
- 700+ scripts
- UiPath logo

The screenshot shows the D-GEM portal interface. On the left, a large dark blue circle contains the text "Digital Global Enterprise Model" and a button labeled "About D-GEM". To the right, a network diagram features several nodes: "Grade Mix", "Location Mix", "Competencies", "Digital Global Process Model", "Technology", "Pricing", and "Governance". The Capgemini logo is in the top right corner. At the bottom, there is a disclaimer: "The information included on D-GEM portal is and shall remain the property of Capgemini. ©2019 Capgemini. All rights reserved. All D-GEM materials are available online on our portal and can only be used for the purpose of the projects delivered by Capgemini. If you require further details or assistance, please contact [D-GEM admin team](#)." and a button labeled "Skip to dashboard". A hand is shown interacting with the screen on the right side.

Examples of how Capgemini contributes to Global UiPath Go! and Global RPA Community

Enabling with Capgemini & UiGo! & pipefy

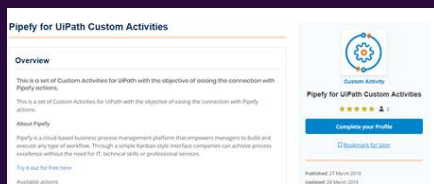

We needed a tool to enable Augmented Workforce and combine Human & Virtual workers with a no-code workflow.

Sharing the best in class

Sharing an entire library to enable developers globally to learn from our lessons learned
