Deploy, manage, and secure your UiPath robot workforce

Deploy attended and unattended robots and automations simply by adding users to Active Directory – with deprovisioning when the user is removed from the group.

Manage all your unattended and attended robots centrally, with universal monitoring - and remote control and optimization for unattended robots in the cloud or on-prem.

Lower TCO through enterprise-scale deployment and management that integrates with the systems you already use.

Complete automation lifecycle support with versioning and role-based control
Orchestrator Mobile management app for iOS and Android
Enterprise Credential Support through pluggable or encrypted native stores
Execution failure snapshots and transaction failure retry
Multiple unattended UI-less processes in the same Windows session
Compliance and security with centralized monitoring, analysis, and audit on a secure, certified platform.

RBAC management at the tenant and modern folder level with fine-grained permissions for separation of duties

Comprehensive logging of all robot and automation actions, plus customizable, centralized business exception alerts

Data encryption in-transit (https with TLS 1.2) and at rest (AES-256) ISO 27001: 2013 and Veracode certifications across SaaS and on-prem License insights shown across the entire enterprise Audit log of every action in Orchestrator

Open and extensible architecture with multiple deployment options - and the world’s largest RPA community in your corner.

Deploy as SaaS with UiPath Automation Cloud, third-party cloud IaaS/PaaS, or on-prem REST API’s for standards-based integration with ERP, BPM or 3rd party systems Uptime guarantee in the UiPath Automation Cloud, or High Availability add-on option on-prem Predictable support lifecycle: frequent feature updates or fewer upgrade cycles are your choice Powerful pre-built integrations with 3rd party products reduce time to automation value Comprehensive online, free, product and API documentation The world’s largest RPA community, and UiPath Marketplace for automation components
People and robots work together as a team to drive measurable impact on your business.

Long-running workflows let unattended robots move on to another important job while waiting for human input.

Transaction Queues with predictive SLA’s help robots meet your business deadlines.

Personal workspaces: everyone can build automations, with centralized control.

Trigger automations remotely by time, or by a threshold of new queue items.

Prioritized jobs and queue editing let you change what your robots are working on.

Business users can respond to long-running workflows from Orchestrator Mobile.
